

Quality Control Instruments

CANS & ENDS • GLASS & PLASTIC/PET CONTAINERS
• BEER & BEVERAGE • CANNED FOOD

Relying on the almost thirty-year-old experience on laboratory instruments for the sectors of canned and bottled food as well as for the ones related to the production of metal, plastic and glass containers, Parmacontrols recently decided to launch a new range of products named LABOMETROLOGY, enterily engineered in Italy with the most innovative technical features but manufactured as per mindful criteria of construction to maintain low their costs.

Basandosi sulla ormai trentennale esperienza in strumenti da laboratorio per i settori alimentare, conserviero e dell'imbottigliamento nonché per quelli di produzione di imballaggi di metallo, vetro e plastica, Parmacontrols ha recentemente deciso di varare una nuova gamma di prodotti denominata LABOMETROLOGY, interamente ingegnerizzata in Italia con le più innovative caratteristiche tecniche ma costruita secondo attenti criteri di realizzazione per mantenerne i costi contenuti.
